BP4 Strong threshold in bootstrap replicate (CADD v1.6 PHRED)
seed 101 (3.6% of replicates fail; bound = 0.152)
seed 202 (3.7% of replicates fail; bound = 0.155)
seed 20260925 (3.4% of replicates fail; bound = 0.310)
seed 303 (3.3% of replicates fail; bound = 0.310)
seed 404 (3.6% of replicates fail; bound = 0.155)
Each curve starts at the fraction of replicates that do not reach the level; the bound is where it crosses 5% (dashed line).
